## Completing the picture

Accenture's Technology Vision report comprises a three-year set of technology trends, currently including trends from 2020 and 2019.

It's important to recognize that each year's trends are part of a bigger picture. Tracking how they evolve over time offers a glimpse into how they may continue to grow in the future.

fact, McKinsey suggests that the rapid acceleration is more of product development. On average, digital offerings have leapfrogged seven years in a matter of months. Whether these changes stay or not, the pandemic has certainly taken digital transformation efforts to levels that few anticipated up until last year. Giving day-to-day tools a digital upgrade ¶¶¶ Adopting digital tools to make information more accessible across the organization, which more than doubles the likelihood of a successful transformation. Earlier this year, the global strategy consulting giant surveyed around 900 C-suite executives and senior managers at businesses around the world, aiming to track digital transformation under the Covid-19 paradigm. You can save time and resources that benefit your own organization and please your customer with a quicker more efficient service. According to Smaje, these expectations are reflected in business transformation efforts. They also have collectively harnessed the power of digital transformation to stay at the forefront of their Define the ambition for the future - alignment of digital strategy to digital strategy to business strategy and aligns talent, people and change strategy through digital enablement develop digital leaders - create a plan to develop digital leadership functionality and evaluate the Leadership Readiness for Change Revenue The Organization - Develops a new design organization to embrace digital culture and evaluate the new development capacity of a digital talent strategy to engage and allow people - Transition the workforce to the new digital organization, aligns Performance metrics and plan to support the advantages that an organization can expect once processed are the following. For over 60% of respondents, shifts in consumer behavior and requests are here forever. The digital transformation should be at the forefront of the organizational strategy of each business, and is defined as "the adoption of digital technology to transform services or companies, replacing non-digital or manual processes with digital processes or replacement of technology Digital more ancient with new digital technology ... For example, the way in which products and services are delivered through the cloud virtually. Below are three summaries of their experiences in digital transformation related to people, processes and technologies. Surely it is certainly not something that happens during the night and takes a great investment sum. Quote-to-cash and price-estimation are not isolated silos in digital transformation, are deeply integrated with other processes to achieve optimal results, eg improvements of the process. Amplement, these shifts extend: by changing the needs or expectations of Customers increase work and collaboration, use of the most advanced technology' in business and decision making; Higher rates' of cloud migration and data security investments and restructuring of the supply and redistribution chain. Let's take the case of teleworking. Companies are making these crisis-related changes with the long-term mind, he added. The survey covered various sectors, size of enterprises and functionality, functionality, has produced the unanimous conclusion that digitization has skyrocketed this year. Source: In many cases, digital offerings are possible without more fundamental digital transformation initiatives. Digitization improves efficiency áÁ If digital transformation leads to improved service delivery through new technological processes, áÁÁ. For the rest of the metrics, about half or more expect the changes to have at least a holding power in the post-recovery period, while the lowest share is 41% expect neighborhood or insourcing practices to be a reality of the future. Under lockdown and tired of infection, consumers have warmed up to the idea of using ecommerce for everything from grocery shopping to financial transactions. Have the right and digital-minded leaders á€"Leaders of individual initiatives and office leaders of the program management or transformation who are dedicated full-time to the change effort. As a result, the percentage of digital customer interactions around the world is three years ahead of what you would have had the pandemic occurred. Á The response to this change has been impressive. As a result, the growth of the digital supply of products/services jumped forward by an average of seven years in just a few months of 2020. Aiming at the moon will have an organization until now only when the daily focus is on goals and performance. Communicating frequently with traditional and digital methods á € Clear communication is essential during a digital transformation. It's not. never the necessary buy-in of the end user and the leaders of an organization Á € á € Á € "™ she led a discussion group with the leaders of organizations that digitally transformed their organizations and these were the key topics that constantly emerged during the discussion. The reveals companies have spent more money' on digital investment than on any other continuity measure business during the pandemic, including cost reduction and customer . According to a McKinsey & Company study, companies were surprised at the speed of the process and the success of their digital initiatives in response to COVID-19. McKinsey asked respondents about twelve pandemic-induced shifts and the likelihood They will remain strong during the economic upturn. There are challenges to overcome before an can realize benefits of digital transformation. However, older and older members of an organization have the best business sense. "The interviewees are three times more' likely to say that at least 80% their customer interactions are digitalÁ," said Kate Smaje, Senior Partner at McKinsey & Company in London. However, this easily digestible definition is not simply applied in the workplace. Surprisingly, offerings in Asia Pacific have undergone up to 10 years of progress in a fraction of the time. time.
