The idea was interesting as was what the film was hyped up to be, the trailer looked great and the high ratings and critical acclaim promised even more. My thoughts were that 'Black Panther' was a decent and intriguing film with a lot of very well done to great elements, but it didn't blow me away and left me disappointed after the hype. As indicated, far from hated it, didn't love it. Actually saw 'Black Panther' on opening weekend in a sold out showing (it was touch and go as to whether a ticket could be gotten), but had to properly form my thoughts for a while and was nervous seeing the very divisive IMDb reaction and the condescension on both sides (mostly negative), which has slightly died down since to feel less nervous.Starting with the good/great things, 'Black Panther' is mostly impressive visually. The special effects were variable, but there were some spectacular ones, while it's beautifully and stylishly shot, slickly edited and sumptuously costumed. It's the extraordinary production design that was most note-worthy. Loved the use of technology, which was really cool. The music has the right amount of haunting intensity, energy, dignity and pathos, so a fine score on its own but not always utilised right in the film, a few ill-fitting moments mood-wise.Much of the action is exciting, though there could have been more, and there is a good deal of thought-provoking script-writing with some nicely injected humour. One is immersed in the world of Wakanda, which is a fascinating world in thematic terms. The story does grip once it gets going and doesn't feel as confused and jumpy, with timeline and location changes needing to be clearer, like it did to begin with and a lot of it even when turning our everyday struggles on their heads is surprisingly relevant. Personally thought that much of the acting was good, with a very charismatic lead performance from Chadwick Boseman, Michael B. Jordan bringing a self-loathing conflicted edge and swagger to Killmonger and Andy Serkis relishing his role with aplomb. The women are just as good, with a dignified Lupita Nyong'o, regal, no-nonsense and feisty Danai Gurira and particularly a funny and endearing Letitia Wright. While his role is small, Daniel Kaluuya is great fun in it. Direction is above competent, if not innovative, and really appreciated the film making Killmonger more than the standard Marvel villain, here one with questionable personal motives but one where one can see his point of view and empathise. Although his actions are inconsistent and don't always make sense and he could have been more threatening, generally he is one of the better Marvel villains and the most developed character in a film too full of stock ones (the titular character being the other exception). 'Black Panther' has faults however. Most of the characters are stock and clichéd, while some of the first half is too talky, the film is a little slow-going and confused to start with and some of the political elements are laid on too thick. Adding to the general feel that, even with the splashes of humour, the film takes itself too seriously and with the amount of predictability it has doesn't do enough new with a novel concept. There are exceptions to the cast. Forrest Whittaker is wasted as a non-developed character with too short screen time, on top of the scene being rushed his final scene has no impact as a result. Martin Freeman is too fish out of water as well. Although some of the effects are spectacular, others are veryropy. Especially in the final action scene between Black Panther and Killmonger which resembled a very early days/years video game. That scene also felt rushed, sometimes vaguely choreographed and anti-climactic, though the whole climax felt over-stuffed and too busy. Overall, decent and interesting but was expecting more. Personally don't think it's the best Marvel film, while a long way from bad let alone terrible, for me it's one of the weaker ones. 6/10 Bethany CoxTheLittleSongbirdMar 5, 2018See detailed box office info on IMDbProSuggest an edit or add missing contentYou have no recently viewed pages Watch Black Panther (2018) full movie online free in hd HD720px, 1080p. King T'Challa returns home to the reclusive, technologically advanced African nation of Wakanda to serve as his country's new leader. However, T'Challa soon finds that he is challenged for the throne by factions within his own country as well as without. Using powers reserved to Wakandan kings, T'Challa assumes the Black Panther mantle to join with ex-girlfriend Nakia, the queen-mother, his princess-kid sister, members of the Dora Milaje (the Wakandan 'special forces') and an American secret agent, to prevent Wakanda from being dragged into a world war.
